

citizenM 'proof of vaccination' policy Switzerland

What you need to know

From **25th October**, there are new Covid-19 rules in place, set out by the government of Switzerland. Unsure what rules apply to your situation? <https://travelcheck.admin.ch/home>

For people aged 16 and over, access to the indoor areas of restaurants and bars where people consume food and drinks on the premises must be restricted to holders of a valid COVID certificate.

- proof of vaccination that is valid for the Swiss authorities. See this website for more information:
<https://www.myswitzerland.com/en-ch/planning/transport-accommodation/travel-to-switzerland/where-and-when-is-what-open/>, or
- proof of recovery – a positive COVID test which is at least 11 days old and maximum 180 days old, or
- negative test result no older than 24 hours
- registered hotel guests without the above can order room service or use the outdoor area to eat and drink

This rule applies to all registered guests and visitors who wish to eat and drink at canteenM. The COVID certificate is not needed if not eating or drinking, and is also not required for overnight stays at the hotel.

Can I stay in the hotel without any of the above?

Yes, you can stay in our hotel and use the living room. However, you cannot consume any food or beverages in the living room – they must be consumed in your room (we offer room service) or outside.

Which vaccines are accepted?

The vaccine you received must have been approved by the European Medicines Agency (EMA) or be on the Emergency Use Listing of the World Health Organization (WHO). An overview is available on the official website: <https://foph-coronavirus.ch/>.
